

KUSHAGRA CHAUBEY

Aspiring Data Scientist | Machine Learning & NLP

Pune, Maharashtra | +91 76666 71795 | kushagrachaubey11@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, graduating 2027; CGPA 8.52/10) with hands-on experience building, evaluating, and deploying end-to-end machine learning and NLP systems. Proficient in Python, Scikit-Learn, Pandas, NumPy, and SQL, with a strong foundation in statistical modelling, feature engineering, and model evaluation. Built and deployed two independent ML applications from data preprocessing through live web deployment. Seeking an entry-level Data Scientist, ML Engineer, or Data Analyst role to apply analytical and modelling expertise in a data-driven environment.

TECHNICAL SKILLS

Languages: Python, SQL

Machine Learning: Scikit-Learn, Naive Bayes, Logistic Regression, Random Forest, Cosine Similarity, TF-IDF, CountVectorizer, Feature Engineering, Model Evaluation (Accuracy, Precision, Recall, F1-Score), Cross-Validation, Hyperparameter Tuning

NLP: Text Preprocessing, Tokenisation, Stemming, Stopword Removal, Bag-of-Words, WordCloud, NLP Pipelines

Data Analysis & Visualization: Pandas, NumPy, EDA, Data Cleaning, Statistical Analysis, Matplotlib, Seaborn

Databases & Tools: PostgreSQL, MySQL, Jupyter Notebook, VS Code, Git, GitHub, Streamlit

PROJECTS

Email/SMS Spam Classifier | *Python, Scikit-Learn, NLP, Streamlit, TF-IDF, Naive Bayes*

- Engineered an end-to-end spam detection pipeline on the UCI SMS Spam Collection dataset (5,572 messages); trained and benchmarked Naive Bayes, Logistic Regression, and Random Forest classifiers, selecting Multinomial Naive Bayes as final model with 97.42% accuracy and 93% precision on held-out test data.
- Built a text preprocessing pipeline (tokenisation, Porter stemming, stopwords removal, TF-IDF/CountVectorizer) that transformed raw message text into ML-ready feature vectors.
- Deployed the trained classifier as a real-time Streamlit web application delivering instant spam/ham predictions; conducted EDA using WordCloud and bigram frequency analysis to identify class-discriminating linguistic patterns.

Content-Based Movie Recommendation System | *Python, Pandas, Scikit-Learn, NLP, Cosine Similarity*

- Architected a content-based recommendation engine over 5,000 TMDb films, fusing five metadata fields (overview, genres, keywords, cast, director) into unified feature vectors via a 5,000-feature Bag-of-Words representation.
- Applied NLP preprocessing (lowercasing, whitespace normalisation, stemming) across structured and unstructured metadata, improving feature signal quality and recommendation coherence.
- Serialized trained similarity matrices to eliminate redundant recomputation, enabling sub-second inference and delivering top-5 contextually relevant film recommendations per query.

Additional Projects (SQL Analysis, Linear Regression): github.com/kush14codes

EDUCATION

B.Tech in Computer Science — Pimpri Chinchwad University, Pune

Aug 2023 – May 2027

CGPA: 8.52 / 10

Relevant Coursework: Machine Learning, Data Structures & Algorithms, Database Management Systems, Statistics & Probability, Linear Algebra
